

**OWA**

OWA ceiling systems.  
Greater safety and wellbeing.

## OWA - Odenwald Faserplattenwerk GmbH

### Design. Passion. Performance.

For more than seventy five years, OWA has incorporated flair and passion to the creation of unique ceiling systems that inspire whilst ensuring lasting **safety and wellbeing**. OWA designs combine tradition with innovation and through a continuous pipeline of creativity, represents real added value for our clients, whatever the application. With **outstanding ceiling systems, committed employees** and a **consistent focus on service**, our company embodies the highest 'Made in Germany' quality mark.

Our OWA brand is synonymous worldwide with high-quality ceiling systems that combine design and functionality in a unique way.

Together with designers, specifiers, distributors and specialist contractors, OWA always ensures greater wellbeing in every room of every building, whether in places of **learning, offices, retail spaces, healthcare environments, hospitality, sports** and **leisure** or **production facilities**.

**Tradition.  
Innovation.  
Lifestyle.**

With its own sales companies and a close-knit partner network, OWA is active in over 80 national markets. Together, we demonstrate our passion for holistic ceiling solutions every day.

Ever since the company was founded, we have been driven to satisfy the highest demands for modern **design** and optimal **room acoustics** alongside **fire protection, hygiene, moisture resistance** and **indoor air quality** and therefore actively support the intended room function.

LONGEVITY.

**OWA lifetime collection**  
 Mineral ceilings for timeless interiors.

Met leven toegerust voor beiden,  
 liep ik vannacht de gangen in.  
 die naar u leidden.  
 Het ondergronds geburchts droeg  
 een stilte, die met tegenzin  
 mijn tijd verdroeg.

De muren en de wanden  
 zorgden voor een zacht  
 doorgoed beschadigd,  
 beten mij uit, de wijf alleen  
 bij u te zijn in 't jongst gericht,  
 hield mij ter been.

Het labyrint verliep in schroeven  
 van eender, blinder cirkeling.  
 U ten behoefte?  
 Ik weet niet meer hoe lang ik ging  
 Hoe brachten zij, die u begroeven,  
 zover een ding?

Totdat mijn voeten op u stuitten  
 uit een volslagen duisternis  
 zag ik uw ogen opensplijten;  
 w handen, die ik niet kon tilien,  
 veldde ik langs het leven strefen,  
 it in mij sloeg;  
 v mond, in dood verholten, vroeg

n taal waarvoor geen teken is  
 fit heelal,  
 stond ik voor de laatste maal.

ir had geen adem meer genoeg  
 en gevluht in dit gedicht:  
 dtrappen naar het morgenlicht,  
 aald en veel te vroeg.

OWA ceiling systems are manufactured in Germany and are synonymous with the highest quality and performance in terms of optimal room acoustics coupled with **fire protection, hygiene, moisture resistance** and **indoor air quality**. They are available in numerous finishes and for different construction systems, making them ideal for ceiling solutions in **retail, restaurants, hospitals, hotels, sports** and **leisure facilities, offices** and **school construction**. Our ceiling systems contribute to increased levels of fire protection and improved room acoustics within these environments. Our mineral ceilings open up a multitude of opportunities to positively shape both our buildings and wellbeing.

CREATIVITY.

**OWAconsult collection** -  
Designer ceiling systems for visionaries.

More freedom, openness and creativity in ceiling design. With the OWAconsult collection, we have created a **modular system** that opens up brand new opportunities for tailored ceiling creations. Our **designer ceiling systems** allow unprecedented design freedom, using unique arrangements to bring individual surfaces to life. These include **lighting modules** using the latest LED technology that enhance the modular ceiling systems in our collection.

FUNCTIONALITY.

**OWAtecta** –  
Metal ceiling systems for individualists.

OWAtecta offers a wide range of metal suspended ceilings that can put complex interior concepts into practice architecturally and functionally. OWAtecta metal ceiling systems suit **commercial spaces**, including special areas, such as **manufacturing facilities, hospitals, healthcare, catering** and **hygiene areas**. With a clear language of form and function, they satisfy the different requirements of special environments.

**PRODUCT** Trapeze & Trapeze LED  
**PROJECT** Mittenwald medical centre

SAFETY.

**OWAconstruct** –  
Suspension and mounting systems to satisfy the most  
stringent demands.

More than 75 years' of expertise forms a stable basis for the quality and **functional reliability** associated with our ceiling systems, including the OWAconstruct range.

OWAconstruct includes a wide range of **construction** and **lighting elements**. Corresponding test certificates prove the **high quality** and associated **safety** and **reliability** of our suspension systems.

## High-quality recipes

Mineral wool – the raw material for OWA mineral ceilings – is one of the most thoroughly researched and carefully controlled building materials in the world. Awarded the **RAL quality seal** for products made of mineral wool, it fulfils all national and international regulations.

OWAcoustic tiles are finished with **solvent-free dispersion paints** that only use **naturally** occurring pigments.

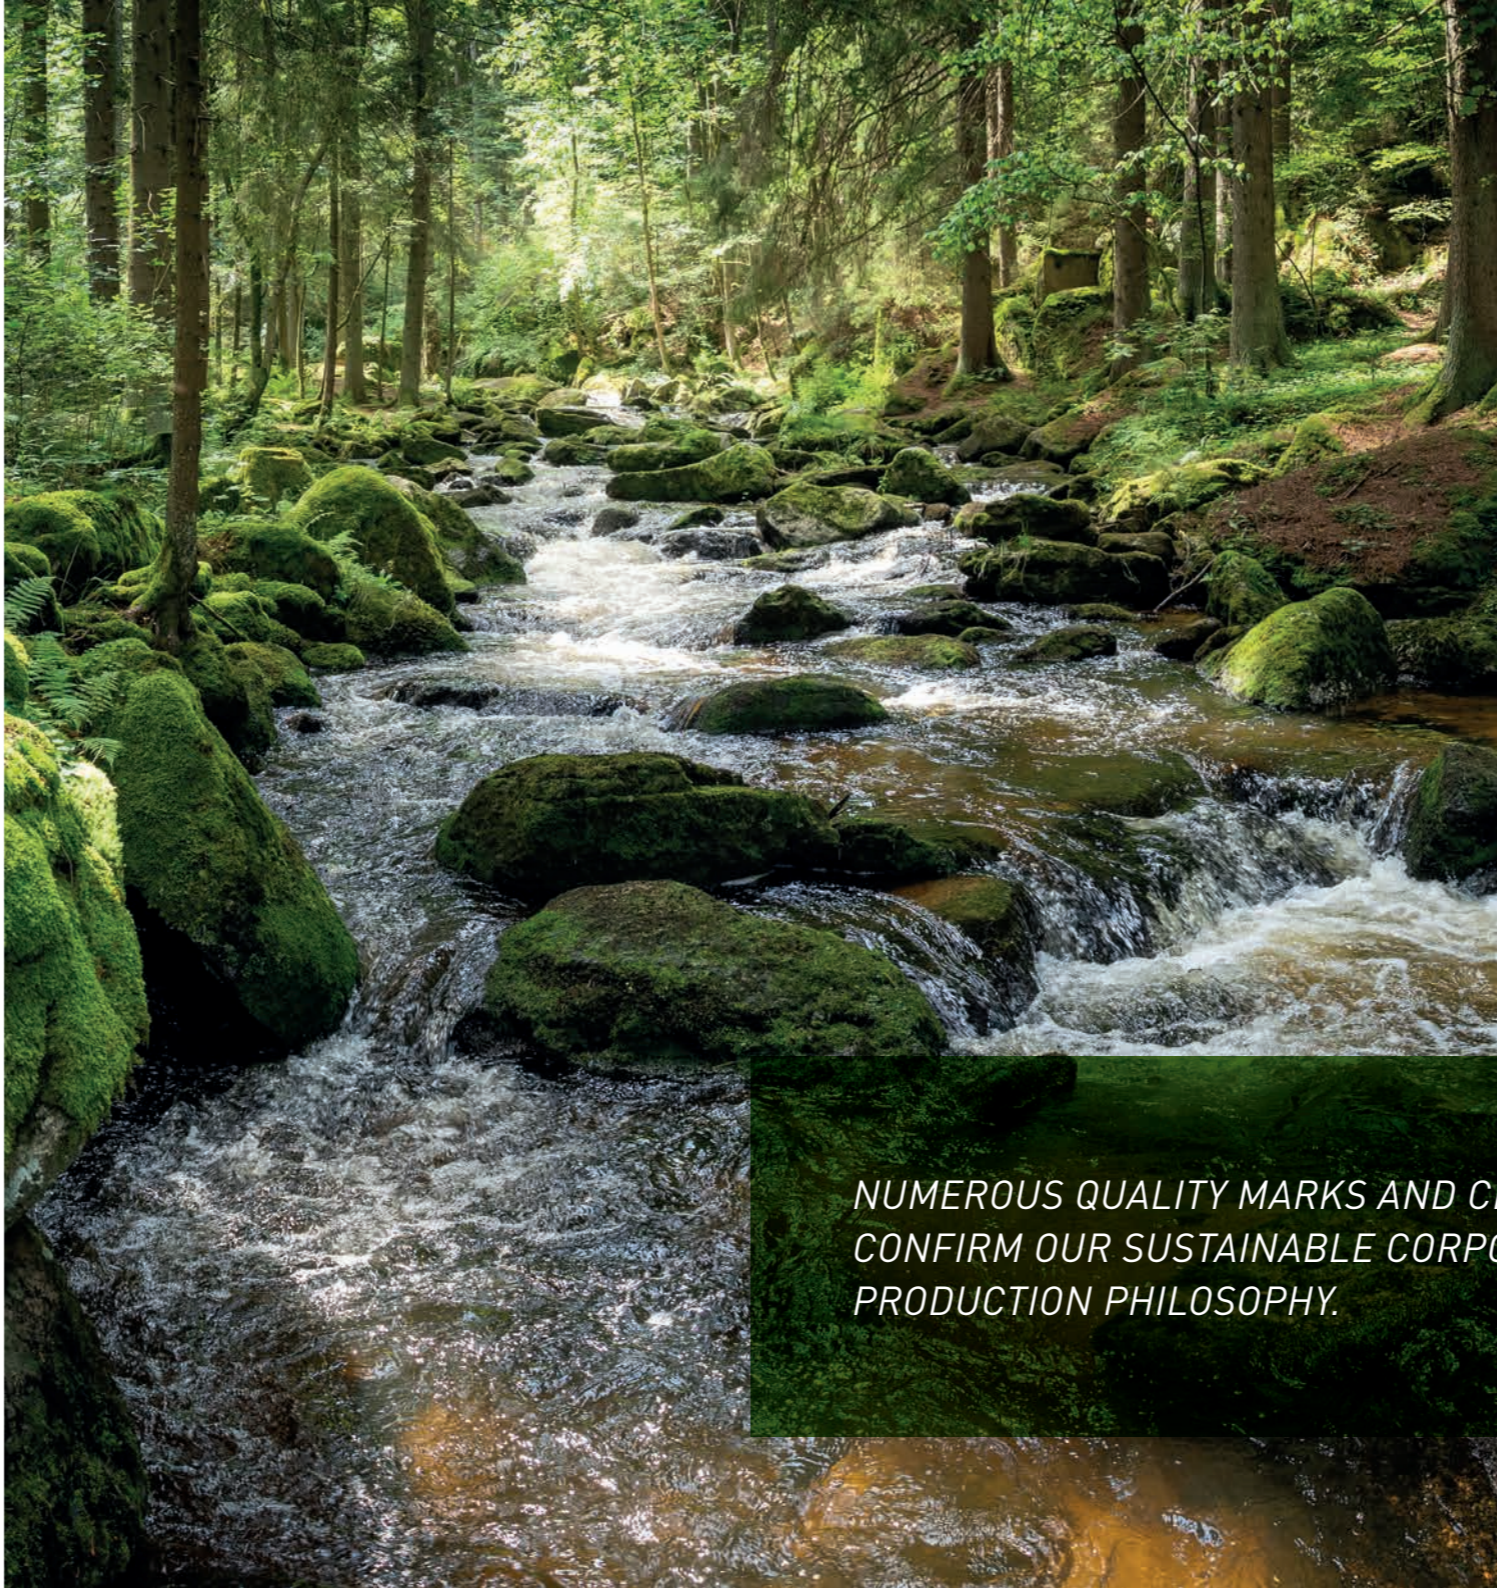

The mineral ceilings we produce are unique in terms of their **acoustic performance, durability, workability, fire protection** and **fire behaviour**.

*OUR MINERAL CEILINGS ARE MADE FROM A HIGH-QUALITY MIXTURE OF NATURAL AND RECYCLED MATERIALS. APPROX. 80% OF OUR RAW MATERIALS ORIGINATE LOCALLY.*

### Resource efficient production

The responsible and efficient use of raw materials forms the basis of our **environmentally conscious actions**. As a company certified according to the international environmental management standard 14001, we are committed to pursuing defined environmental goals in an ongoing improvement process and to continuously monitor both the results and our compliance with all relevant laws. Numerous awards and quality marks motivate us to maintain our commitment to our environment.

### Certified safety

OWA also offers products for buildings that must meet the important requirements of **sustainability certification procedures**. As support for a planned certification according to both the **LEED® green building**, **BREEAM®** and **HQE** standards, and the standard for **DGNB®** sustainable buildings, we offer a variety of suitable ceiling and acoustic solutions.

More awards can be found on our website:

*NUMEROUS QUALITY MARKS AND CERTIFICATIONS CONFIRM OUR SUSTAINABLE CORPORATE AND PRODUCTION PHILOSOPHY.*

## The OWA green circle

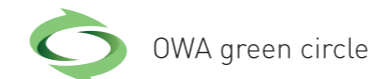

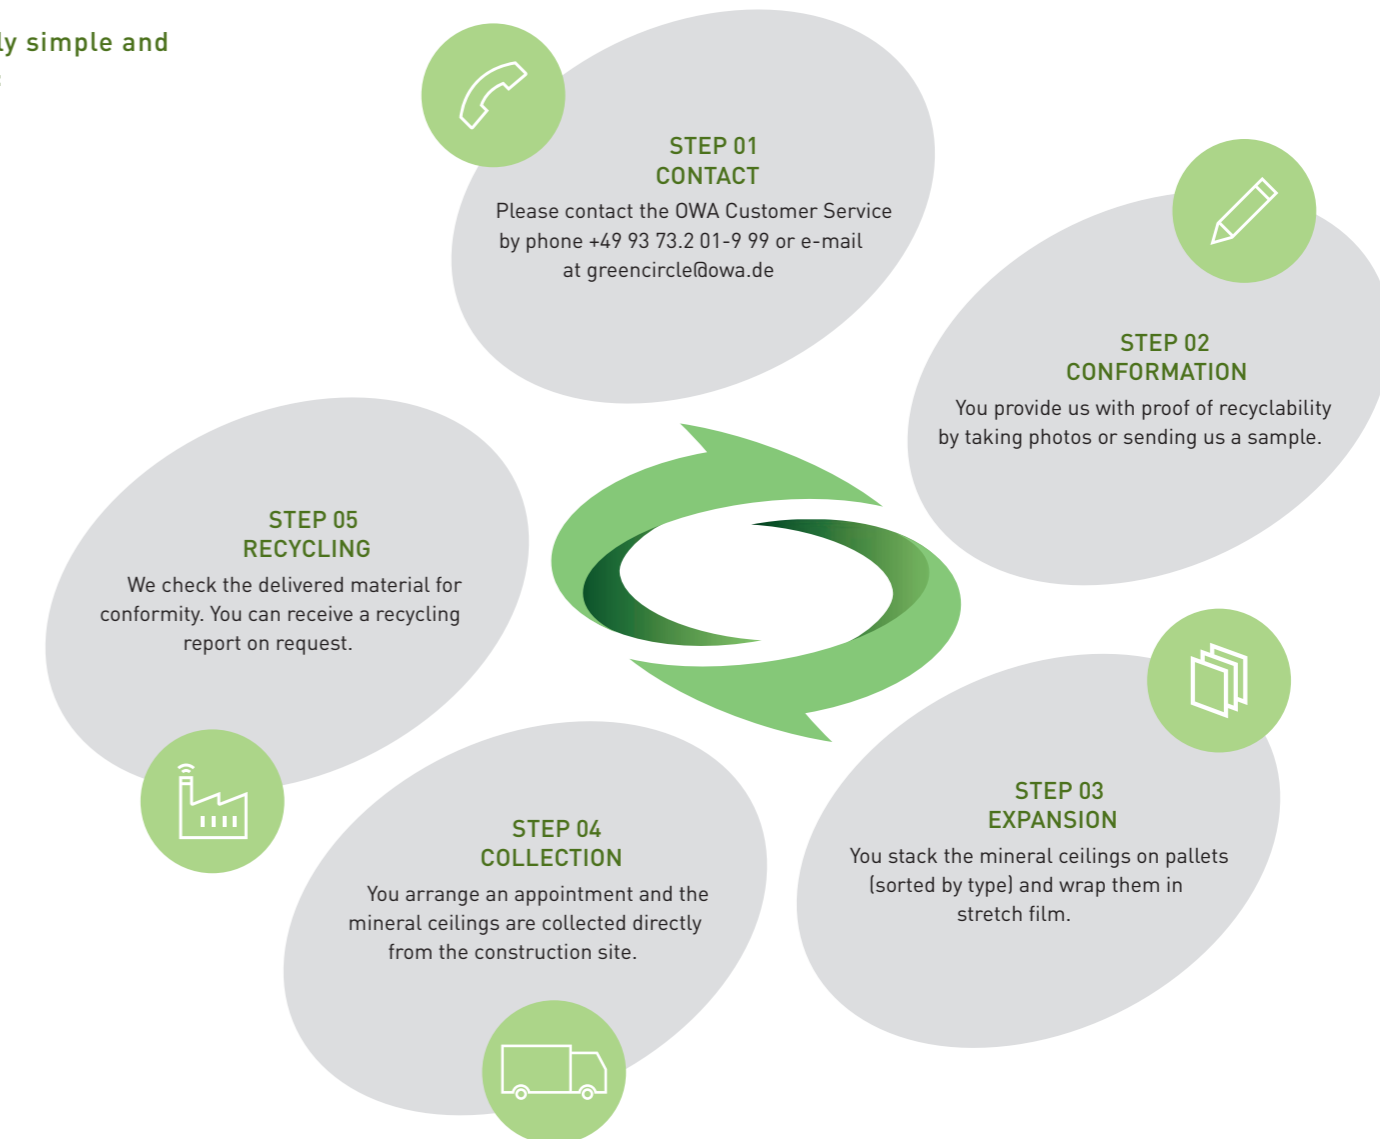

All OWA mineral ceilings from the OWA lifetime collection produced after 1st October 1997 are 100% recyclable and can be returned to us. They are used in the production of new ceiling tiles while adhering to strict quality control procedures.

It is not necessary to place a new order to recycle old OWA mineral ceilings; the recyclable materials cycle can be closed by returning them to the OWA green circle. We can prepare a 'take back' quotation for your own project upon request.

- RESOURCE EFFICIENT PRODUCTION
- CONSISTENT RECYCLING CONCEPT
- OWA MINERAL CEILINGS 100% RECYCLABLE
- RAW MATERIALS TRANSPORTED SHORT DISTANCES
- COMPLIANCE WITH THE STRICTEST ENVIRONMENTAL PROTECTION STANDARDS

Please ask Customer Service if the OWA green circle applies to your market as well:  
tel +49 93 73.2 01 - 0 or e-mail: info@owa.de

The process is extremely simple and works in just five steps:

OWA green circle

\* Foreign materials, such as wood, metal and plaster, and panels that are damp, mouldy or otherwise contaminated must be excluded. The same applies to products from other manufacturers.

## APPROACHABLE & PERSONAL

Outstanding consulting expertise.

Our team of experts, made up of **acoustic consultants**, **designers** and **engineers**, supports architects, builders and contractors in the areas of design, room acoustics, fire protection, hygiene, air conditioning, moisture and chemical resistance.

- TECHNICAL AND PROFESSIONAL ADVICE
- DESIGN AND PLANNING ASSISTANCE
- DETAILED DRAWINGS
- SPECIFICATION TEXTS  
(GENERAL & BUILDING-SPECIFIC)
- STATICS
- PREPARATION OF INSTALLATION PLANS
- LIGHT CALCULATIONS
- ACOUSTIC MEASUREMENTS IN THE PROPERTY

OWA's technical competence extends to full support to enable effective realisation of your project, whether at the design stage with the provision of technical drawings and compliance documentation, or at the construction site to support the specialist contractors with installation guidance. Both our office and field based teams as well as our technical advisory service look forward to your call.

**Office sales team:**
